Dr. James Myers  
Chiropractor  
Brookhaven Team

I clearly remember the morning I walked into the PowerCore meeting wearing what I consider out of season fashion boot on my foot, because I could not put weight on my feet. I tried to be cheerful, but pain is not the best friend for a smile. Dr. James took a look at me as asked: What happened? I can help you with that?

Dr. James is both Empathetic and Compassion with his patients, but if you fail to follow instructions, he will politely shame you into doing what is best for you! He keeps abreast with the latest in chiropractic tools, and because he was once a patient, took an interest in becoming a doctor to help others smile from the heart!

My journey is not over yet, he is still fixing years of not being able to get to the doctor. But I can proudly say, that I will be going on a family vacation, which we have been posting the last three years. Thank you for helping to regain my smile and for helping me feel better!

Sincerely yours,
