Dear Travis,

For the past 8 years we have purchased 3 sets of outdoor cushions for our eating area on the deck. Although my wife would try to run out and get them every time it rained. The cushions ultimately ended up getting dirty and stained from the weather. Well seeing the price tag of her new cushions I was determined for the new cushions not to suffer the same fate.

Well that's where you came in. Your stain sealing process made water just bead off the cushions and they weren't wet even right after the rain, which came just 2 days after your treatment by the way. You even left a little gift bag of cleaning products that I could use on other things as well. I would highly recommend your process to my friends who like me, are constantly repurchasing chair cushions and umbrellas over and over again. Thank you for a great job.
