Thank you Kate!

When I heard your clients could tell you as much or as little as they wanted, I thought of her. Therapy without rehashing the past...interesting, profound and perfect for my private thinking friend! My friend was in a good spot and didn't think she needed any kind of therapy but was intrigued with your approach.

She could feel the difference when subconscious beliefs were released. Moving toward her goals were becoming easier and she expressed her appreciation because she is now in the best spot she has ever been in her life and looking forward to working with you more.

Sincerely,

Tammy Freeman
