Dear Mike,

Thank you for the wonderful job you did cleaning the outside of our home. Having recently moved in with my Parents, there was a lot of maintenance that was not kept up and you took on the task with great enthusiasm and quality of work that I have not found in others that do your work.

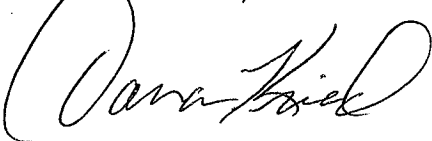

We have had other "professionals" power wash our homes in the past and I can say you did the best job at a great price over anyone doing the job.

I have been in the building trades in the past myself, so I am very familiar with what you do. You showed up on time and continued to work until the job was complete. You took care to remove any items that might be damaged by the cleaning chemicals and put things back after the job was complete. You cleaned out the gutters and made sure they were functioning as designed. You even sprayed down my father's airplane in the backyard, which I am sure was a first for you.

My parents commented that the house looks like it did when they moved in 17 years ago. They were thrilled.

Thank you again for the wonderful job and I highly recommend people use your service without any reservation.

Yours in Health,

Dr. Dana Kind
