DR. JASON REGIS
TRANSFORMATION WELLNESS TEAM

To whom it may concern,

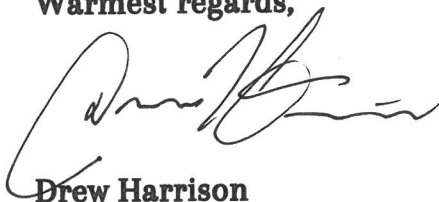

I have had the pleasure of getting to know Dr. Regis both professionally and personally for the last several months. He has proven time and time again to me his wealth of knowledge and experience. I first had the inkling that he operated differently from every other chiropractor I had met when he started describing his process to me.

First and foremost, who his patients are. They are not just patients to care for, they are *team members* to hold accountable. From mandated physical therapy, to a comprehensive medical history analysis first visit, to the fact that one could go every week for a year, and Dr. Regis could do something new to help each time.

For the chiropractic world, there have been ups and downs. I have been a long time believer in chiropractic after an injury during high school, where the physical therapy I experienced was heavily influenced by chiropractic care. As a lesser understood science, I have always attempted to endorse the practice with anecdotes, using myself as an example. In Dr. Regis' case, examples are not needed. A single conversation has convinced me, among several of my colleagues who were skeptical at first, to join the chiropractic community.

I implore you, should you desire a transformative, more fulfilling approach to health, take a moment to give Dr. Regis' team a call. You will be pleasantly greeted by Pauline, the best front desk receptionist in the business, and you'll never look back.

Warmest regards,

 3/1/2025
Drew Harrison
