Dr. Evans

A spine is a terrible thing to waste. After years of struggling with neck and back pain and visiting multiple chiropractors, I was introduced to you. The techniques you use, the time you spend, and your exam room manner make all the difference in the world.

Before the eventual surgery, your treatments helped me get by. You reviewed the many MRI's, explained possible reasons for the pain, and discussed the upcoming rehab. You even treated many other joint and muscular ailments. All while spending 100% of the time talking with me during the entire treatment process.

While sports, work, and aging continue to take its toll on the body, it's great to have a partner in improving my health. Thank you for all that you do. I would gladly refer you to anyone looking for a chiropractor with great attention to detail.

Sincerely
