Dear Chris,

I am writing this letter of endorsement for you today based on my family's experiences using your services.

Whether it was bees in my daughter's storage closet, or the rat that died behind my other daughter's wall, which I still have no idea how you located it...your training and general knowledge of these types of home invaders along with your expert advice regarding how to prevent further infestation is much appreciated. It's refreshing how you actually answer the phone when I call, and you were able to get rid of the bees before my wife got home! Your passion to educate and advise leads me to believe that it doesn't matter to you whether you sell something or not!

I have and will continue to recommend you to my friends, my neighbors or the guy in Home Depot filling up his Homer bucket with various spray cans and traps.

Sincerely,

John W. Hulbert
