To whom it may concern,

David Schleier operates a concierge mechanic service called Breathe Easy which provides mobile car maintenance and repair. I was in need of his services a few weeks ago because my vehicle was not behaving properly. I reached out, and after a short conversation David had diagnosed the issue based solely on my description of the problem. He quickly booked me an appointment and was able to fit me in that same week. Breathe Easy sent a mechanic to my house and they made the repairs to my car right in my driveway. It was extremely convenient and reasonably priced.

After the repair was made, David explained what they did and gave me some advice on further car maintenance. I followed his recommendations and trusted his expertise. When I returned to my car, I noticed there was still a slight issue while driving around. I notified David that I felt like something was still wrong, and described to him the issue. He booked me another appointment at no additional cost.

Within a few days, David himself came out to my house. He made the proper adjustments and completed the work quickly. My car is running better than ever now, and he did not charge me for the additional service. David demonstrated excellent commitment to customer service, and went above and beyond to ensure my ride was cared for properly. The entire team at Breathe Easy was friendly, professional, and provided great communication throughout the process. I would recommend Breathe Easy to anyone with a vehicle that needs maintenance or repairs. The concierge service is inexpensive and totally worth it. I pass my full and eager endorsement to David Schleier and his business Breathe Easy Concierge Mechanic.

Thank you,

*Zachary Ziegler*
