To Whom it My Concern,

When I first met Jacque Streever, I was experiencing severe cracking and staining of the skin on my hands from working as a heavy diesel mechanic. After several months, I decided to follow her recommendations regarding Mary Kay products, and the change in the condition of my hands has been remarkable.

I now rely exclusively on Mary Kay for my hand care. The hand shea scrub and unscented hand moisturizer are my preferred products, keeping my hands clean and professional-looking despite the demands of my work. Customers often comment that I "don't look like a mechanic" because my nails aren't dirty and my skin is not stained with grease. All of my mechanics are now supplied with Mary Kay hand care products, because they have proven—right here in our local shop and with our own team—to be some of the only products that stand up to real automotive work. We have discontinued the use of traditional petroleum-based orange hand cleaners due to both performance and health concerns.

Jacque is highly accommodating, willing to meet during off hours, and treats every referral as if they are her most important customer. In my view, she is not just a sales representative, but a true Mary Kay consultant and dedicated professional.

Thank you, Jacque, for all that you do
