To Whom It May Concern:

I was told a long time ago that one of the best ways to take care of your family is to have the proper life insurance. That was way back in my 20's. Now as I approach 50, this advice means even more to me. As I write this endorsement for Sheldon Berch, I cannot think of anyone I would put more trust in when it comes to this type of security. Sheldon's advice has help me get the protection I need for my family as well as my business. I can sleep well at night knowing I have the right amount of coverage.

Sheldon started in this business in 1991 and his expertise reaches far beyond his many years of knowledge. He learned himself about the importance of Life Insurance at a very young age. I know this is part of the passion he has for this business and how he handles his clients with the best of care. Sheldon says there is no better feeling than giving someone a life insurance check during the time of loss. You might even get a personal delivery. Be assured that this is one area you will not be concerned with during the grieving process.

Sheldon's qualities of patience and excellent communication are evident. The care he showed when I referred my own brother was also impressive. He even answered questions and navigated hurdles during a 4 way phone call that my mother joined. It had taken us the better part of a year, and Sheldon kept in touch with us and was ready to complete the process as soon as my brother was ready. One thing about Sheldon that you will learn is that he is always ready. Even on his off days, he has gone above and beyond to support and execute with the help of his team.

I will conclude by saying that Sheldon values family as he is a father and grandfather. I encourage you to look no further when it comes to providing the best for your family, knowing that he is in your collective corner.

Sincerely,

Dr. Jason Regis DC, MSHS, CSS
