To anyone wishing to know Ben Ragin,

You've made an excellent decision. When I met Ben, my husband and I had just purchased our first house. While our agent and lender were very helpful, no one from our first insurance agency ever walked us thru our options to make sure we were getting a policy that fit us. I was constantly nervous about what might happen to drain our wallets or put us in debt, and I felt ill-prepared for making basic maintenance decisions about our property.

But Ben knew how to help! He explained "all perils coverage;" how sewage backups into the house were handled; the difference between general property and itemized jewelry / artwork; in short, the best policies to protect our assets—including our income. His curated rolodex of car dealers, mechanics, handymen, tree trimmers, and more served us as a trusted resource for any emergency. Taking time to talk over the phone, meet in person, and even answer questions by text, Ben walked us thru the scenarios we face as homeowners. (And he was never intimidated by my auditor husband's in-depth questions or frustration by the six months it took for us to get all our paperwork together for the switch!)

We now maintain our auto, home, and liability insurance policies thru Ben, and we have a plan for growing our coverage as our family and neighborhood expand.

You'll be happy you trusted him.

With warm regard,

Jessica Matthews
