Dear Diana,

Procrastination is the only proper word to use when describing submitting tax information for me. It is difficult to find and organize all the categories needed. The process has always been confusing and overwhelming to say the least. So naturally, delaying was the only option that made sense to me.

Though taxes have become no less confusing, the processes you recommended and explained like the quick books app to keep up with travel and organize purchases has been invaluable. Even in last year's chaos, I was able to submit everything to you on time without needing an extension for the first time ever! You have helped make the entire tax process bearable which I never believed could happen.

Your vast experience, accounting and tax knowledge makes you the best at your job. I am very glad to have you as my CPA. Thank you for all that you have done and do!

I highly recommend Diana of Crawford Merritt & Company to all those, who like myself, need help organizing and managing their accounting and/ or bookkeeping to stay on top of their taxes necessary for their business and personal accounting and to help make sense of the things they do not understand.

Sincerely,

Jamecia Bowers
