Snellville, GA 30039

Dear James:

When I first heard of air duct cleaning, I was skeptical. I was also getting up each morning to sneezing from dust allergies, something I had learned to live with as a condition of being in Georgia. My house was built in 1984 and to the best of my knowledge, the ducts have never been cleaned.

I had previously heard of the benefits of exposing the air to ultra-violet light as long as humans are not exposed. I decided that I would have both services done.

After you left, I noticed tell-tale marks in the carpet where you had vacuumed up any debris that fell from removing vent cover. No other trace was left of the cleaning process. The installation of the UV-C Germicidal Lamp and Photocatalytic Oxidizing Purifier was done quickly and efficiently.

The next morning, my wife and I woke to clear heads and no sniffles from dust allergies. That will result in an immediate savings in the cost of facial tissue as well as a generally improved health all year. I breathe better and am happy to know that regardless of how many people enter my home, be they client or friend, the air in the house is free from allergens and recleaned every time the fan to the furnace / air conditioner starts. I am considering running the fan independently during the higher traffic season of January through April.

Thank you for providing a cleaner and healthier house and office for such a reasonable price.

Sincerely,

A handwritten signature in black ink that reads "Steven P Perry". The signature is written in a cursive style and is positioned above a thin horizontal line.
