To: Dr. Kenny Strack, Strack Chiropractic

Dear Dr. Strack,

For years I've suffered from Shoulder and Lower Back pain that made my work day very difficult! In my line of work, back, shoulder and knee pain are very common issues that guys like me just learn to deal with. As I got older, my symptoms grew more intense to the point that I was limping in pain when I walked. And when I drove my truck around town it was very uncomfortable to say the least. I tried many things that I thought might help ease the pain. I even purchased an Inversion Table and tried that for a while. It helped a bit, but it didn't give me the relief I was looking for.

After years of taking 600 mg of Advil every night so I could sleep, I realized I'd better see a doctor. But not just any Medical Doctor. After all I didn't want to get put on prescription drugs for the rest of my life or worse yet, have back surgery as a last resort. I needed help but didn't know where to look. So, I started attending a Friday morning business meeting in Woodstock, GA. where I met Dr. Strack for the first time. After a few weeks, I made an appointment to go in for an x-ray and assessment.

I've had Chiropractic adjustments in the past many years ago and figured that this would be a similar "Snap-Crackle-Pop" experience. But you were different. You took the time to evaluate my posture, my movements, the way I stood up and sat down. You listened to me tell you about my past injuries and came up with a treatment plan that is specific to my personal needs. You even gave me some exercises to do at home to help with my recovery. And now about a year later, I'm 90% pain free and I don't have to take any pain medication to sleep through the night anymore and I have even brought my 2 teenage High School boys in to see you for their injuries as well.

Thank You Dr. Kenny, you truly are "The Real Deal" in your field of Chiropractic Care and I look forward to many more years of pain free living as I get along in age.
