Re: Endorsement

Dear Jon,

This letter is to thank you for helping us with our insulation issues in our home. We have struggled for years with an air conditioning system that was not able to keep us under 80 degrees from Spring through Fall. I finally talked my wife into having you out to correct the problems we had. You sealed the wall plates, insulated the knee walls and of course increased our blown insulation in the attic. The attic tent you installed is working well and created a memorable moment the first time my wife ascended the stairs to find our luggage. Surprise!

For the first time ever, and I stress EVER, she asked me to turn the air down because she was freezing! We had a week of 100+ temperatures and we were able to keep the air on 73 throughout the week. I know that a 20 degree improvement from the outside conditions to the inside is a reasonable amount. We never thought that we could achieve over 30 degrees. I am convinced that the improvements you made to our home are the reason we are so comfortable this summer.

Your professionalism, timeliness and expertise is greatly appreciated and we will have little trouble referring you to our friends and family should the need arise. Thank you again for your assistance and we both wish you the best with your goal to educate homeowners about the benefits of proper home insulating.

Sincerely,

Steven Roberts
