I would like to thank Matt for the work he did on my accounting books. I lived in fear of my Quickbooks Online for the last 5 years. A few mistakes in and I thought I would never have my books looking right. After meeting with him and listening to him talk about his experience and knowledge in Quickbooks I finally felt confident I was working with someone who knew what they were doing. Unfortunately he seemed to find one mistake after another I had made over the years. It is amazing what you don't know when you simply don't know it. He stayed in contact throughout the whole process and let me know what the next step was at every new step. The most important part is he was able to explain to me the reasons he was correcting things, and the proper way to use Quickbooks Online going forward. I can finally do the accounting side of my business with confidence.

In the time since he helped me get everything in line, he has also helped me since. Everytime I have a question and am afraid to do something wrong (I have a history there) I can reach out to him and helps me to get it done correctly. He is always quick to answer and in a way that helps me, a very illiterate bookkeeper, to understand it.

After he helped me with my business accounting books, there was no doubt who I would be using for my business taxes. And mine and my wifes personal taxes after that.

I can say without a doubt I feel safe introducing people I know to Mathew so he can help them in the same way he helped me.

Sincerely,
Justin Cox
