Dr. Axt,

The primary reason for me writing you is to express my deep appreciation for what you have done in a short period of time with my son. After joining the Milton PowerCore team and your mentoring of me, I developed a trust in you.

It just so happened that my son was experiencing chronic back pain due to several disk problems. After a few trips to some specialists and some experience with another chiropractor, we thought it was time to chart a new course for his recovery. After only a few visits with you at your office, my son seems to really like your personality, your approach and your ability to relate to his age and pain situation.

I just wanted to shoot you a quick note to say thanks and I would endorse you to others.

Thanks again

Todd Greenberg
