Dear Katie

Just wanted to let you know how much Diana and I appreciated your advice this past year.

We were especially impressed by your knowledge, thoroughness, and your clear customer focused approach.

You demonstrated to us you really cared about our situation and worked very hard to find the best options for us and that we could afford.

As you know, small business owners tend to do everything themselves, and these days, it is very important to make sure you set up your business in the correct way from the get go.

Your approach was practical, strategic, clear and concise and while you came across as this unassuming and easy going professional, we could see you exhibit a keen eye for identifying wrongs and that command a great and convincing nature when going about protecting our interest. Let's just say I'd hate to have to face you in court!

Thank you once again Katie!

Sincerely

Tony De Feria
