In a society and community where personal transportation is critical, it's comforting to know Tony is available to assist us with navigating our way through the purchase and delivery process. It's been almost 5 months since Tony helped me source and purchase my 2016 Avalon. From start to finish; including consideration, selection, auto auction, delivery, and pick up, the process only took about 2 weeks. In my view, the difference that Tony provides is his attention to detail and ensuring that what you expect is what he delivers. Tony is a "car guy" which means he's a stickler for ensuring that mechanically and aesthetically, his cars meet his standards and he's not happy unless you're happy. Additionally, his access to other resources for window tinting, body work, touch up, accessories, etc.... provided for a complete experience rather than a list of things for me to do after I take delivery.

In my opinion, I saved time and money by allowing Tony to work the process for me and source exactly what I wanted.

Tony De Feria, Owner of Executive Auto Brokerage, is the man to work with when you're in the market for a low mileage, highly rated, pre-owned vehicle. I give Tony 5 stars!
