Alec,

Thank you for the professional advice you gave me concerning our roof. We have had several spots form on the ceiling in our bedroom and our son's bedroom, and have become increasingly concerned about the integrity of our roof.

After your drone survey revealed no major defects, we understood that we did not need a new roof, but did not know who could address the minor issues. Your recommended roof repairer found and repaired the issues in less than 2 hours, and the total cost for us was less than \$200.

Thank you for checking our roof and recommending someone to repair it. When we do need a new roof we will be calling you, and I'll recommend you to my future clients, as I know they will be well taken care of.

Sincerely,
