September 20, 2012

Dear Dr. Mike,

I am far overdue in writing this letter of appreciation for all the wonderful treatment you have provided to my family, my clients and me over the past years.

As I have often told others, I have been to many chiropractors, since the age of 8. Due to several injuries, the first of which was at age 2, I had chronic problems with neck pain and resulting effects of the underlying misalignment of my cervical spine. Other chiropractors treated me with varying levels of effectiveness, but it wasn't until I "put my neck in your hands" that I was able to achieve lasting results. What a difference it makes to live without chronic headaches, stomach problems and neck pain!

Moreover, I am so grateful for the care you have provided to the many massage therapy clients I have referred to you. Many had been told by "specialists" that they would simply need to learn to live with chronic, severe pain because no other treatment options were available. In each of these cases, you have given them relief and helped them regain their normal lives.

Your knowledge, caring and professionalism are a model for all health professionals and make it easy for me to recommend you to everyone I know who is interested in gaining and maintaining not only pain relief, but the best health and wellness possible.

Again, thank you for all you do.

Yours very truly,
