

Joseph P.
Subluxation free Since Birth

My son's birth was very difficult. There were hours of labor followed with a C-section. During the C-section, Joseph was pulled forcibly by his head and neck which we later found out caused a misalignment in his spine. The misalignment affected his nervous system, which decreased his immune system and left him lethargic and slow moving.

The chiropractors were able to detect the problem and get it fixed without any dangerous drugs or surgeries. The procedure was very gentle and Joseph is now an excited, active and fully expressed 1 year old.

Thank God for chiropractic and the docs of Life Empowerment Institute!
