Dr. Mike and his team are amazing! Ironically, I went to see him after having pain in my foot following running a marathon. I don't normally see doctors but felt he could help me after hearing great things about him. After just one session my foot was immensely better and has been improving ever since. Dr. Mike is so much so a great healer that I converted my significant other from his former chiropractor in hopes that Dr. Mike could remedy his migraines that he's had for almost 3 decades. Boy was I right! Brandon has mentioned how his head was immediately relieved of pressure and how his headaches intensity is noticeably minimized after **JUST ONE SESSION!** Shortly thereafter, he also exclaimed how he has never felt better in his whole adult life (of which has been over a couple decades). I would highly recommend folks immediately see Dr. Mike whether it be for a foot, your back, or even migraine headaches. He's incredible!

Sincerely,

Katrina Duquemin
