Dr. Michael Axt

Alpharetta, GA 30022

Dear Dr. Axt,

It is with deep gratitude that I share that my chronic foot pain has gotten so much better in just the few months that I have been in your care. When the pain started a couple of years ago, I went to several different health care professionals, but only got confusing diagnoses and minimal relief, along with a lot of medical bills.

Although you treat my whole body, your specialty in working with extremities has really made a difference in relieving my recurring pain. The manipulations and treatments you perform at your office have been more extensive and more beneficial than anything else provided by the other doctors. You also coach me on the types of exercises I can do at home between visits, which has been very helpful. Thanks to you, last week while on vacation I was able to take short walks on the beach and hikes through the maritime forest.

I appreciate and highly recommend you for your knowledgeable insight, your caring attitude and your professional expertise. I'm looking forward to continued improvements and am anticipating that soon I will once more be pain-free while doing the hiking and dancing activities I've had to curtail.

With deep gratitude and respect,

Linda M. Loud
