RE: Endorsement Letter
Excellent Work on Behalf of Jones, Steele, & Booth, LLC

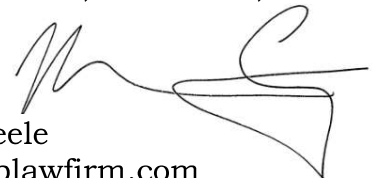

Dear Nance:

When we first met at your visit to my 30076 Roswell PowerCore team, I thought, "This seems like a professional, knowledgeable person who can help my law firm find office space." Little did I know then, but your tireless efforts and abounding resourcefulness would not only prove my first impression right—but blow it out of the water completely.

Lawyers have a bad reputation for being difficult to work with, and I certainly don't think this transaction was any exception. We had countless questions and many concerns. You addressed all of them quickly and with that in-depth knowledge of the properties and process that can only come with years of experience and an unwavering commitment to your clients. We put you through a lot, no doubt. But your ease of manner and friendly disposition made the process smooth.

And after all of that, we backed out of the deal, deciding to go another direction. And you took that news with the same good humor and professionalism that you had the rest of the process. You made what could have been a very awkward conversation pleasant and funny. I very much regretted that we could not finalize the deal, but having worked with you makes me look forward to the next time I am in need of office space. I know who my very first call will be – Nance!

Sincerely yours,
JONES, STEELE, & BOOTH, LLC
