"People Remember People Who Remember Them."

2-11-10

To say I have been impressed with Terisha's knowledge of her profession is an understatement. Her massage techniques are by far the most concentrated and results oriented of any therapist I have known over a 40 year span. Terisha's constant pursuit of learning new methods and applications of massage therapy is tribute to her dedication to insure her clients receive the best care and results.

As an example of her knowledge and skill let me relate how she used massage to correct what I thought was a torn rotor cuff. After one deep massage, 80% of the associated pain went away and following her advice on what not to do, I experienced 100% lost of pain and full recovery with in two weeks.

Her knowledge of the muscular system and her continued pursuit of learning new skills and techniques allow her to treat a variety of problems from sports injuries, heartburn, difficulty in becoming pregnant and a variety of other issues most people would not associate with massage.

I can strongly endorse Terisha for her professional and adaptive approach to her practice.

Sincerely,

BOB DUBROF
