To other people dealing with chronic pain,

Six years ago, a distracted driver changed my life forever. Since that time, I have struggled to put my life back together. Every day has been filled with pain in my left hand and wrist. I could not wash my hand. Water hurt. Air hurt. Simple gentle touch caused so much pain that generated dizziness and nausea to debilitate me continuously. My doctor's suggested medications and surgery. The doctors even implanted a spinal stimulator to lessen my daily pain.

Chiropractors have adjusted me for over 30 years. Dr. Laurie Dady has so much passion for helping people live a full and fruitful life. Her knowledge and understanding of the human body exude through every infominate. She intrigues me each time she presents new material. When she spoke about her new massage therapist, I knew I needed an appointment.

The Center for Health and Healing welcomes each client with peace and tranquility. Nancy Trout listened carefully to my needs. I scheduled a deep tissue massage, yet her expertise directed me to a lymphatic massage. After the first massage, my body responded so positively. I lost weight. I gained function in my left hand. Now after a number of massages, I am overwhelmed by the amount of function I continue to regain in my left hand. I was told this loss was permanent. I was told I was permanently disabled. Nancy and Dr. Dady have given me hope that my body can heal. That gift can never be repaid. Everyone may not respond this way, but everyone should open their mind to such potential. "Thank you" does not seem enough for the gift given to me.

Please go see Dr Dady at The Center for Health and Healing. You, too, may obtain results beyond your wildest imagination.

Sincerely,

Pamela J Saunders
