Business Owners who have websites, logos, & brochures,

Little did we know how important a great website along with an eye-catching logo and overall streamlined branding will increase business. While we had an okay website, business card and brochure describing our business, we didn't have a true logo or a streamlined look. We had different fonts, smaller size font, etc. Knowing the right company to work with, though, is key.

Working with Kriston and Emily at id8 was a wonderful experience for Nancy and me. Kriston patiently explained what needed to be changed and tweaked as well as streamlined everything to look the same; from brochures to business cards to our website, it all looks terrific! Both Kriston and Emily kept after us as far as proofing things and keeping us steadily moving towards the completion of the project.

We have had many compliments about the website from our existing patients as well as new patients looking for care. If you are looking for a company that knows branding, are top-notch-professional, and execute their plan for you seamlessly, Kriston Sellier and id8 are it!

Satisfied and Happy Client,

Dr. Laurie Dady
