RE: Russell Davis and Mermaid Hunter Photography and Drone Service

I wanted to take this opportunity to thank you for helping me with some photos that father took when he was in the Navy 65 years ago. The film was 120mm role, which is very difficult to find someone to print the photos off the negatives. Not only did Russell do a great job of scanning the negatives into a digital format, he used his photo editing software to get rid of the yellowing and clean up scratches on the negatives. These photos are irreplaceable, and it was comforting to know he would treat them with respect and care to preserve them.

My father passed away last year so this was greatly appreciated. He trimmed the negatives and placed them in an acid free negative holder and gave them back with a flash drive of the prints as well. He sent me the digital formats online and I was able to share them with friends and family. He truly saved a piece of history I was not sure we would ever be able to recover. Thank you so much.

Yours in Health
