

Dr Mike Fenster
House of Chiropractic

Dear Dr Mike,

Although I had stopped going regularly in the years before I started at your practice, I have always been a fan of chiropractic care. It took a chronic pain in my middle back to get me in your office but I am so glad I did.

My issue ran down my back and through arm for a week and was only getting worse before I made my first appointment with you. I try to stay active but this pain brought any activity to a halt, including just taking a walk or even sitting at my desk.

Your adjustments are gentle and I felt relief within an hour of seeing you the first time. Continuing to get adjusted has gotten me back doing the things outdoors that I enjoy. I can definitely feel the difference in my whole back now after seeing you regularly. It feels so much more flexible and when I stand up straight I feel like I am able to actually achieve that.

Your office is not only convenient, but comfortable. I love that you have a play area for kids there and when I walk over with my dog, she is welcome inside.

Chronic TMJ got me into this, and I know it will take maintenance to keep me feeling good.

Thank you so much for your care and expertise. I never hesitate to recommend you.... my husband is even going to you regularly now.

Sincerely,
