

In 2015, a year after I started Gaddiel Home care Services I hired a company to design a website for me; I had that website for about eight years, never questioning the back-end workings of it. A few years later, I hired a Search Engine Optimization (SEO) company to help with our presence on Google; after 2years and nothing to improve our presence on Google, I reached out to an Online Marketing company to look at what the SEO company was doing wrong and how if there was any way their company could help with our Google presence. I later learned that I had no luck with my SEO company because my website could have been better designed...

At that point, they recommended I get Sean Cantkier of Darwin Studios LLC. to look at it and possibly redesign the entire website before I could think of Search Engine Optimization. I talked to Sean, and he immediately got to work. I discovered I didn't even own the right to my company's domain name. The web design company I had to create the website initially did.

It was challenging for Sean to get back the domain name "gaddielservices.com" for me would be an understatement. Because the company did not want to relinquish it, but Sean Persisted. The back and forth went on for almost two months; Sean kept me in the loop the whole time, assuring me he would get it done. And he sure did. Got me to register with a Go Daddy account and transferred my domain name to me.

Sean went above and beyond throughout the process, which he didn't have to do. But His calm and collected "Kumbaya" demeanor was present; the desire to ensure I had a functional website that I owned the right to the domain name spoke a lot about Sean's integrity. Thank you to Sean and Darwin Studios for looking out for me and my company, we now have a website that looks amazing, functional and easy to navigate.

I highly recommend Darwin Studios LLC for all your website design needs.

Regards,

Director
