Dear Terisha,

All I can say is WOW! What a difference you have made in my life.

Although I have a massage therapist I have used for a long time, I decided to try you out so that I could get a feel (no pun intended) for your techniques and level of sensitivity for your patients.

I presented with a multitude of health issues, including fibromyalgia, a very painful condition. Your "athletic" approach to the massage was just what I needed. Because of the intense pain I have been experiencing, I assumed a lighter touch was better, but not so. You knew exactly what I needed to break the cycle. Even better, you kept checking with me during the massage to see if I was okay. I was better than okay and the next day was totally pain free with a sense of well being and peace I haven't felt in years, yes years!

You are the consummate health professional with a sensitivity, expertise, and professionalism I wish more in the medical profession possessed.
Thank You!

Wanda Hickman
