Dear Terisha;

I have had massages with other therapists but after just my 2nd massage with you, I wanted to let you know you have an intuition few other massage therapists have.

With just an initial conversation at the start of the massage, you are then able to determine what areas need work (often ones I was quite unaware of). As the massage progresses and you find one of these unknown areas you are then able to adjust w/o pause in midstream to take care of that spot. That takes intuition ☺

When I run across folks that need the gift of touch, I will not hesitate to recommend your services

With much appreciation!
