February 3rd 2023

Dear Dr. Kenny,

I come from a long history of insurance professionals which has always had my family and I on edge when it has come to Chiropractic care. When I first made the appointment with you I had reservations because my past experiences had not been positive but hearing you speak I could tell you were different so I gave it another shot. I initially came to see you for knee pain I was experiencing, and I was needing to wear a knee brace given to me by my primary care physician to do most labor intensive activities. When I sat down with you; You focused on what I was doing in my daily routine that might be causing my pain. We established that the location of my wallet and how I was sitting not only at my desk but while driving my truck was more than likely making my pain worse. I was also given "homework" exercises to re-engage my gluteus. I knew after my first visit that you were special, you clearly cared about stopping my pain for good not just for a few days with a few pops. When I followed your instructions, I was amazed at how much better I felt over the next few months, and I am proud to say today that I have know idea where that knee brace is, nor do I care because my knee feels great! I know as I age that new pains and bad habits will pop up but I am glad to know that I have you on my team to help me concur them and keep moving! Thank you Dr. Kenny, you have restored my faith in the medical community and you have been an excellent friend.

Sincerely,

Christopher M Eells
