

Russell Davis

Mermaid Hunter Photography and Drone Services

Dear Russell,

My office location was in need of adequate signage that clients could view clearly from the office parking lot, and you suggested a few ideas that would greatly improve this situation:

1. Overhead drone footage that would help clients actively view the office, and surrounding areas.
2. Interactive virtual photography that would guide clients from the office front door and straight into the location.

With your wealth of knowledge, and professional equipment, you were prompt in starting and completing the project within record time.

My website now has footage that will help new clients identify where they are going, and have them less stressed when they arrive. I appreciate your expertise.

Respectfully,

*Connie Cooke*
