

## Big Sky Construction

I've been in my house since 2005 and have always wanted to change my master bathroom. It took me a while to build up enough savings to make a few changes. I reached out to Rob Mickler and he came over to take a look at what I wanted to do. I wanted to remove the huge builder rectangular mirror, add shiplap, paint, install new floors and install the new mirrors. Rob did what he had to do with measuring and to take a look at the flooring I had left over from the time I had to replace my flooring downstairs. He explained to me exactly what this would all entail and put me on the schedule to have my mini renovation.

The subcontractors showed up exactly when they said they would and began to perform their magic. Rob stopped by to check on the work and I told him I was very pleased. Once the job was complete they cleaned up and it was like they weren't even there. Once I put everything back in the bathroom I was so happy! It looks amazing. Now I'm ready to do another mini renovation!

I would highly recommend Rob Mickler of Big Sky Construction for any job whether it is a mini renovation like mine or a huge renovation because I know it will be done right and with TLC. The best part of all of it is the pie you receive from him as a thank you.

Thank you Big Sky Construction!
