An endorsement for Stefan Delay:

Our front yard was dying for lack of water, so we hired Stefan Delay of Stefan Proscapes to fix our sprinkler system. We thought the issue was in one part of the line, but Stefan quickly dug it up and relieved our worries on that score.

However, when he activated the next line to test it, it was instantly leaking gallons of running water because a bush had been planted directly over a sprinkler head and it was destroyed. He knew exactly how to fix everything and was finished in less than two days.

Now I won't have to spend my summers hand-watering my plants to keep them alive in the heat and my husband can watch our grass grow.

Thank you, Stefan, for a job well done!

Sincerely,

Melissa Moody
