January 28, 2020

Let me introduce you to a wholistic tax accountant that positively impacts your life and business.

If you are looking for the tax accountant that has your back, I can tell **Yvette D. Best** will not drop off the face of the earth after she completes your taxes. She has a very particular set of skills, skills she has acquired over a very long, diverse career that blends her knowledge of numbers and the law. These skills make her a godsend for her clients and a nightmare for the IRS.

I first met Yvette at a referral networking meeting in 2016 and learned that she is a Tax Accountant. In 2017 after learning that my current accountant was having legal problems, my husband and I chose to interview other tax accountants.

We chose Yvette for several reasons. We researched her background and customer satisfaction ratings and found them to be outstanding. Additionally, we support minority-owned businesses especially those businesses in our local community. We believe in group economics, so it was important that we work with a business that supports other local businesses.

Yvette has been preparing our personal and business taxes ever since. Her commitment to continuing educations ensures that she is current on tax law and regulations that benefit her clients immensely. Her professionalism is unparalleled; my taxes are completed in a timely and accurate fashion. During the year when I have experienced tax issues, I am always able to make an appointment with her and get them corrected.

When my colleagues complain about their tax challenges without hesitation, I recommend Yvette D. Best of Best Service Unlimited, LLC.
